Practical 10
AI Text Bias & Plagiarism

Aim

To analyze AI generated text for plagiarism and bias.

Objectives

• To detect biased statements

• To improve writing

Materials Required

• ChatGPT / Gemini

• Grammarly

Procedure

1. Generate paragraph from AI – Use an AI writing tool to produce a clear, coherent paragraph on your chosen topic.

2. Check plagiarism – Run the paragraph through a plagiarism checker to ensure originality and proper attribution.

3. Check grammar – Review the text with a grammar tool to correct errors in punctuation, spelling, and sentence structure.

4. Identify biased statements – Examine the content for subjective language, assumptions, or one-sided viewpoints.

5. Rewrite neutrally – Revise the paragraph to remove bias, ensuring the tone is balanced, objective, and fact-based.

Online and offline learning both play important roles in a college student's education, and each offers unique benefits. Online learning provides flexibility, allowing students to attend classes from anywhere and learn at their own pace. It is especially helpful for those who balance studies with part-time jobs or personal responsibilities. However, offline learning offers direct interaction with teachers and peers, creating a more engaging and disciplined learning environment. Students can participate in discussions, clear doubts instantly, and gain practical experience through labs and group activities. Therefore, neither method is completely better; a combination of both can provide a more effective and balanced learning experience for college students.
